## EDUCATION

### Bachelor Of Engineering ,Computer Science

Anjuman Institute Of Technology & Management

10/2019 - 07/2022

### Diploma In Computer Science

R N Shetty Rural Polytechnic

07/2016 - 08/2019

### Secondary [ X ]

New English National High School

06/2015 - 06/2016

## WORK EXPERIENCE

### Frontend Developer [ React ]

Oysters

08/2022 - 04/2023

Mumbai

Achievements/Tasks

- Collaborated with cross-functional teams to develop and launch a new e-commerce website using React.
- Implemented responsive designs using HTML, CSS, and React to improve website accessibility and user experience.
- Built and maintained reusable React components to streamline development and improve website performance.
- Optimized website load times and reduced server requests by 30% through implementation of lazy loading techniques.
- Worked closely with the design team to implement new features and functionality, resulting in a 20% increase in user engagement.
- Worked in an agile development environment, delivering work on time and collaborating with team members to ensure project success.

## PROJECTS

### ValetX (04/2023) [🔗](#)

- Designed and developed a user-friendly React web application, **ValetX**, that enables users to reserve parking spaces by scanning a QR code and choose a preferred time to retrieve their vehicles.
- Implemented three separate portals - Super Admin, Company Admin, and End User - with distinct roles and permissions to facilitate efficient management of the platform.
- Utilized best practices in software development, including agile methodologies, version control with Git, state management with Redux, and backend services, to ensure scalability, security, and maintainability of the application.

### ToskrTail (12/2022 - 03/2023) [🔗](#)

- The **ToskrTail** App is a web-based application developed using React that helps users manage their **tasks**, **events**, and communication in a single platform. The app includes features like a **mailing** system, **task** management, **event** management, and a **chat** system.
- **Mailing System** : Users can send and receive emails within the app. The app has an inbox, outbox, and draft section where users can view their messages.
- **Task Management** : The app includes a task management system that allows users to create, edit, and delete tasks. Users can set due dates, priorities, and labels for their tasks.
- **Event Management** : The app includes a calendar that allows users to manage their events. Users can create, edit, and delete events and set reminders.

### Blockchain Certificate (10/2022 - 12/2022) [🔗](#)

- Blockchain Certificate is a web-based application developed using **React** that enables users to upload and verify their certificates using digital signatures. The app is built on blockchain technology, which makes it **secure**, tamper-proof, and decentralized.
- **Upload Certificate** : Users can upload their certificates to the app. The app uses **IPFS** (InterPlanetary File System) to store the certificates, ensuring that they are securely stored and easily accessible.
- **Certificate Verification** : The app allows users to verify their certificates using the digital signatures. Users can input the certificate ID and verify the signature to ensure that the certificate is authentic and has not been tampered with.
- Back-end is developed with **node.js**.
